COVID-19
Safety Solutions

Ensuring safety during COVID-19 is everyone's responsibility.

Automatic, contactless
Body Temperature Scanner

The automatic body temperature scanner kiosk measures the temperature of individuals. It helps limit the spread of infection while mitigating safety risks for staff tasked with fever screening using a handheld scanner.

Fast

The temperature kiosk can process up to 20 persons a minute. Faster than any handheld temperature scanner.

Contactless

No touch. Eliminates the need for a staff member to stand and individually scan visitors and employees.

Accurate

Accurate, fully automated body temperature scan.
